OUR OFFER

1. **Load Study and Preliminary Design.** No-obligation study to determine if solar is an ideal alternative electricity source for you.
2. **Installation design.** We will work on the most optimal design to maximize your operational savings.
3. **Equipment and Components.** We source only from trusted global equipment manufacturers.
4. **Installation up to commissioning.** We will supply the equipment and components and ensure that the installation work is performed to the highest standards of quality.
5. **Maintenance Services.** We provide maintenance services to ensure optimal output.
6. **Equipment Warranty.** We will facilitate your warranty claims with the manufacturer in the event of a problem. All you have to do is reach us at solutions@excell.energy to obtain the required technical assistance.
7. **Web services.** The system we will provide will include an online service for viewing and monitoring of the installation 24/7.
